Don't kiss your sweetheart while "Spanish flu" or pneumonia plague is on!	"Spanish flu" is staging a "come-back."
You might kill her—or him, by passing a deadly germ along.	Medical authorities fear it will attack 40 per cent of the people.
Kissing Spreads "Flu"	Doctors and nurses everywhere are overtaxed in the fight.
Don't sneeze or cough in anybody's face. Use your handkerchief to cover nose and mouth.	They need the help of every person in the community in preventive measures.

**CREAM APPLIED IN NOSTRILS MAY
PREVENT SPANISH INFLUENZA**

**Says Cream Applied in Nostrils
Opens Air Passages
Right Up.**

Instant relief—no waiting. Your clogged nostrils open right up; the air passages of your head clear and you can breathe freely. No more hawking, sniffing, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed-up with a cold or nasty catarrh.—
