AIC NETBOOKS: OPTIMIZING PRODUCT ASSEMBLY

INTRODUCTION

The AIC Netbooks case examines some of the issues and solutions related to the proper organization of product assembly lines. It demonstrates that organizations in the technological sector can help achieve more, spend less and deliver better to remain relevant. Here's a structured case solution analysis

AIC NETBOOKS

AIC Netbooks is a personal computing industry company, which is under pressure to reduce its production costs. Following the rising trends in portable and cheap netbooks, an efficient assembly is deemed to be paramount.

LABOR MANAGEMENT

This situation affects general organizational outcomes such as: High turnover and limited, and thus inconsistent, training of workers in assembly lines.

CONCLUSION

The AIC Netbooks case particularly has demonstrated the relevance of the conception of lean production systems to stay competitive. Introducing efficient solutions that eliminate babels and applying other best practices, AIC will be capable to become a market leader in the sphere of netbooks production.

RECOMMENDATION

This case is just a sample partail case solution. Please place the order on the website to order your own orignally done case solution.
