Healthcare.Gov The Crash And The Fix

Introduction

On the part of the too big to fail, Healthcare.gov which is an online health insurance marketplace created by the Affordable Care Act flopped massively. Though its operational vision is to make affordable healthcare accessible to millions of Americans, its implementation was marred with design and functionality errors as well as con clases de preparacion insuficientes.

Poor Planning

So, again, it can be said that Healthcare.gov's problem is due to the lack of public health planning and cooperation. Industry analysis pointed towards problems with the government's ability concerning project management the control of vendors, and the setting of overly optimistic timeframes.

Lessons Learned

This case shows that no large-scale digital project is something to be taken lightly, it requires adequate planning, consensus on the part of key stakeholders, as well as proceeding through iterations. Further, it emphasizes on the need for precise human operational involvement of experience crunch individuals during emergencies for handling a system fault.

Conclusion

The crash of the Healthcare.gov and its revivals are a great lesson about the 프로.vendor management of large-scale digital transformation. The case shows that planning, technical know-how all conceptualized and designed with the user at the center will go a long way in determining the success of the project.
