

*Foreign Ownership
of US Treasury
Securities*

Introduction

Treasury Securities displays the ways and means of international investors in connection with the U.S. government securities. An analysis of foreign owners is important in regards to the US scenario given the importance of the Treasury securities market to global economy.

Foreign Ownership

Global investors have lately bought more Treasuries from the United States than they did in the previous years. This trend could be as a result of fairly secured and liquid funds investments compared to other investments such as stocks and property.

US Economy

The escalation of foreign ownership of U.S. Treasury securities has consequences for the U.S. economy in various ways. On one side it facilitates funding of the national debt and supports ruling expenditures. Thus, frequent use of the FDI puts into question issues such economic sovereignty and sensitivity to global economic shifts, amplified by reliance on foreign investors.

Conclusion

The F Outstanding Issues in the Foreign Ownership of UST Securities can help throw light on the issues of international finance and the impact of foreign investors on the United States economy.
