# *Introduction*

The Real Estate Final Case Study is devoted to activities and challenges concerning real estate operations, project, and investment. It seeks to understand the issues arising with real estate developers, investors, and managers in the continually shifting background.

# *Key Issues Identified*

This case illustrates various factors such as market variation, grant, legal restraints, and program hold-ups. Knowledge of these factors is very important in the formation of real estate development and investment business. Decision makers have to distinguish between cost and benefit and develop plans that can minimize risks.

# *Risk Management*

Thus, considering risks can be considered for the formation of effective strategies for functioning in the sphere of investments in real estate. Market risks and regulations can be managed through the risk management plan eliminating instability of the market.

# *Conclusion*

The Real Estate Final Case Study is a rich source of insights regarding challenges of managing the real estate projects. Consequently, the case solution progresses to address the financial, market and operations problems that need to be solved to realize business success in real estate.

# Resource

This is just a sample partial case solution. Please place the order on the website to order your own originally done case solution.
