# AADHAAR – GIVING AN IDENTITY TO INDIA

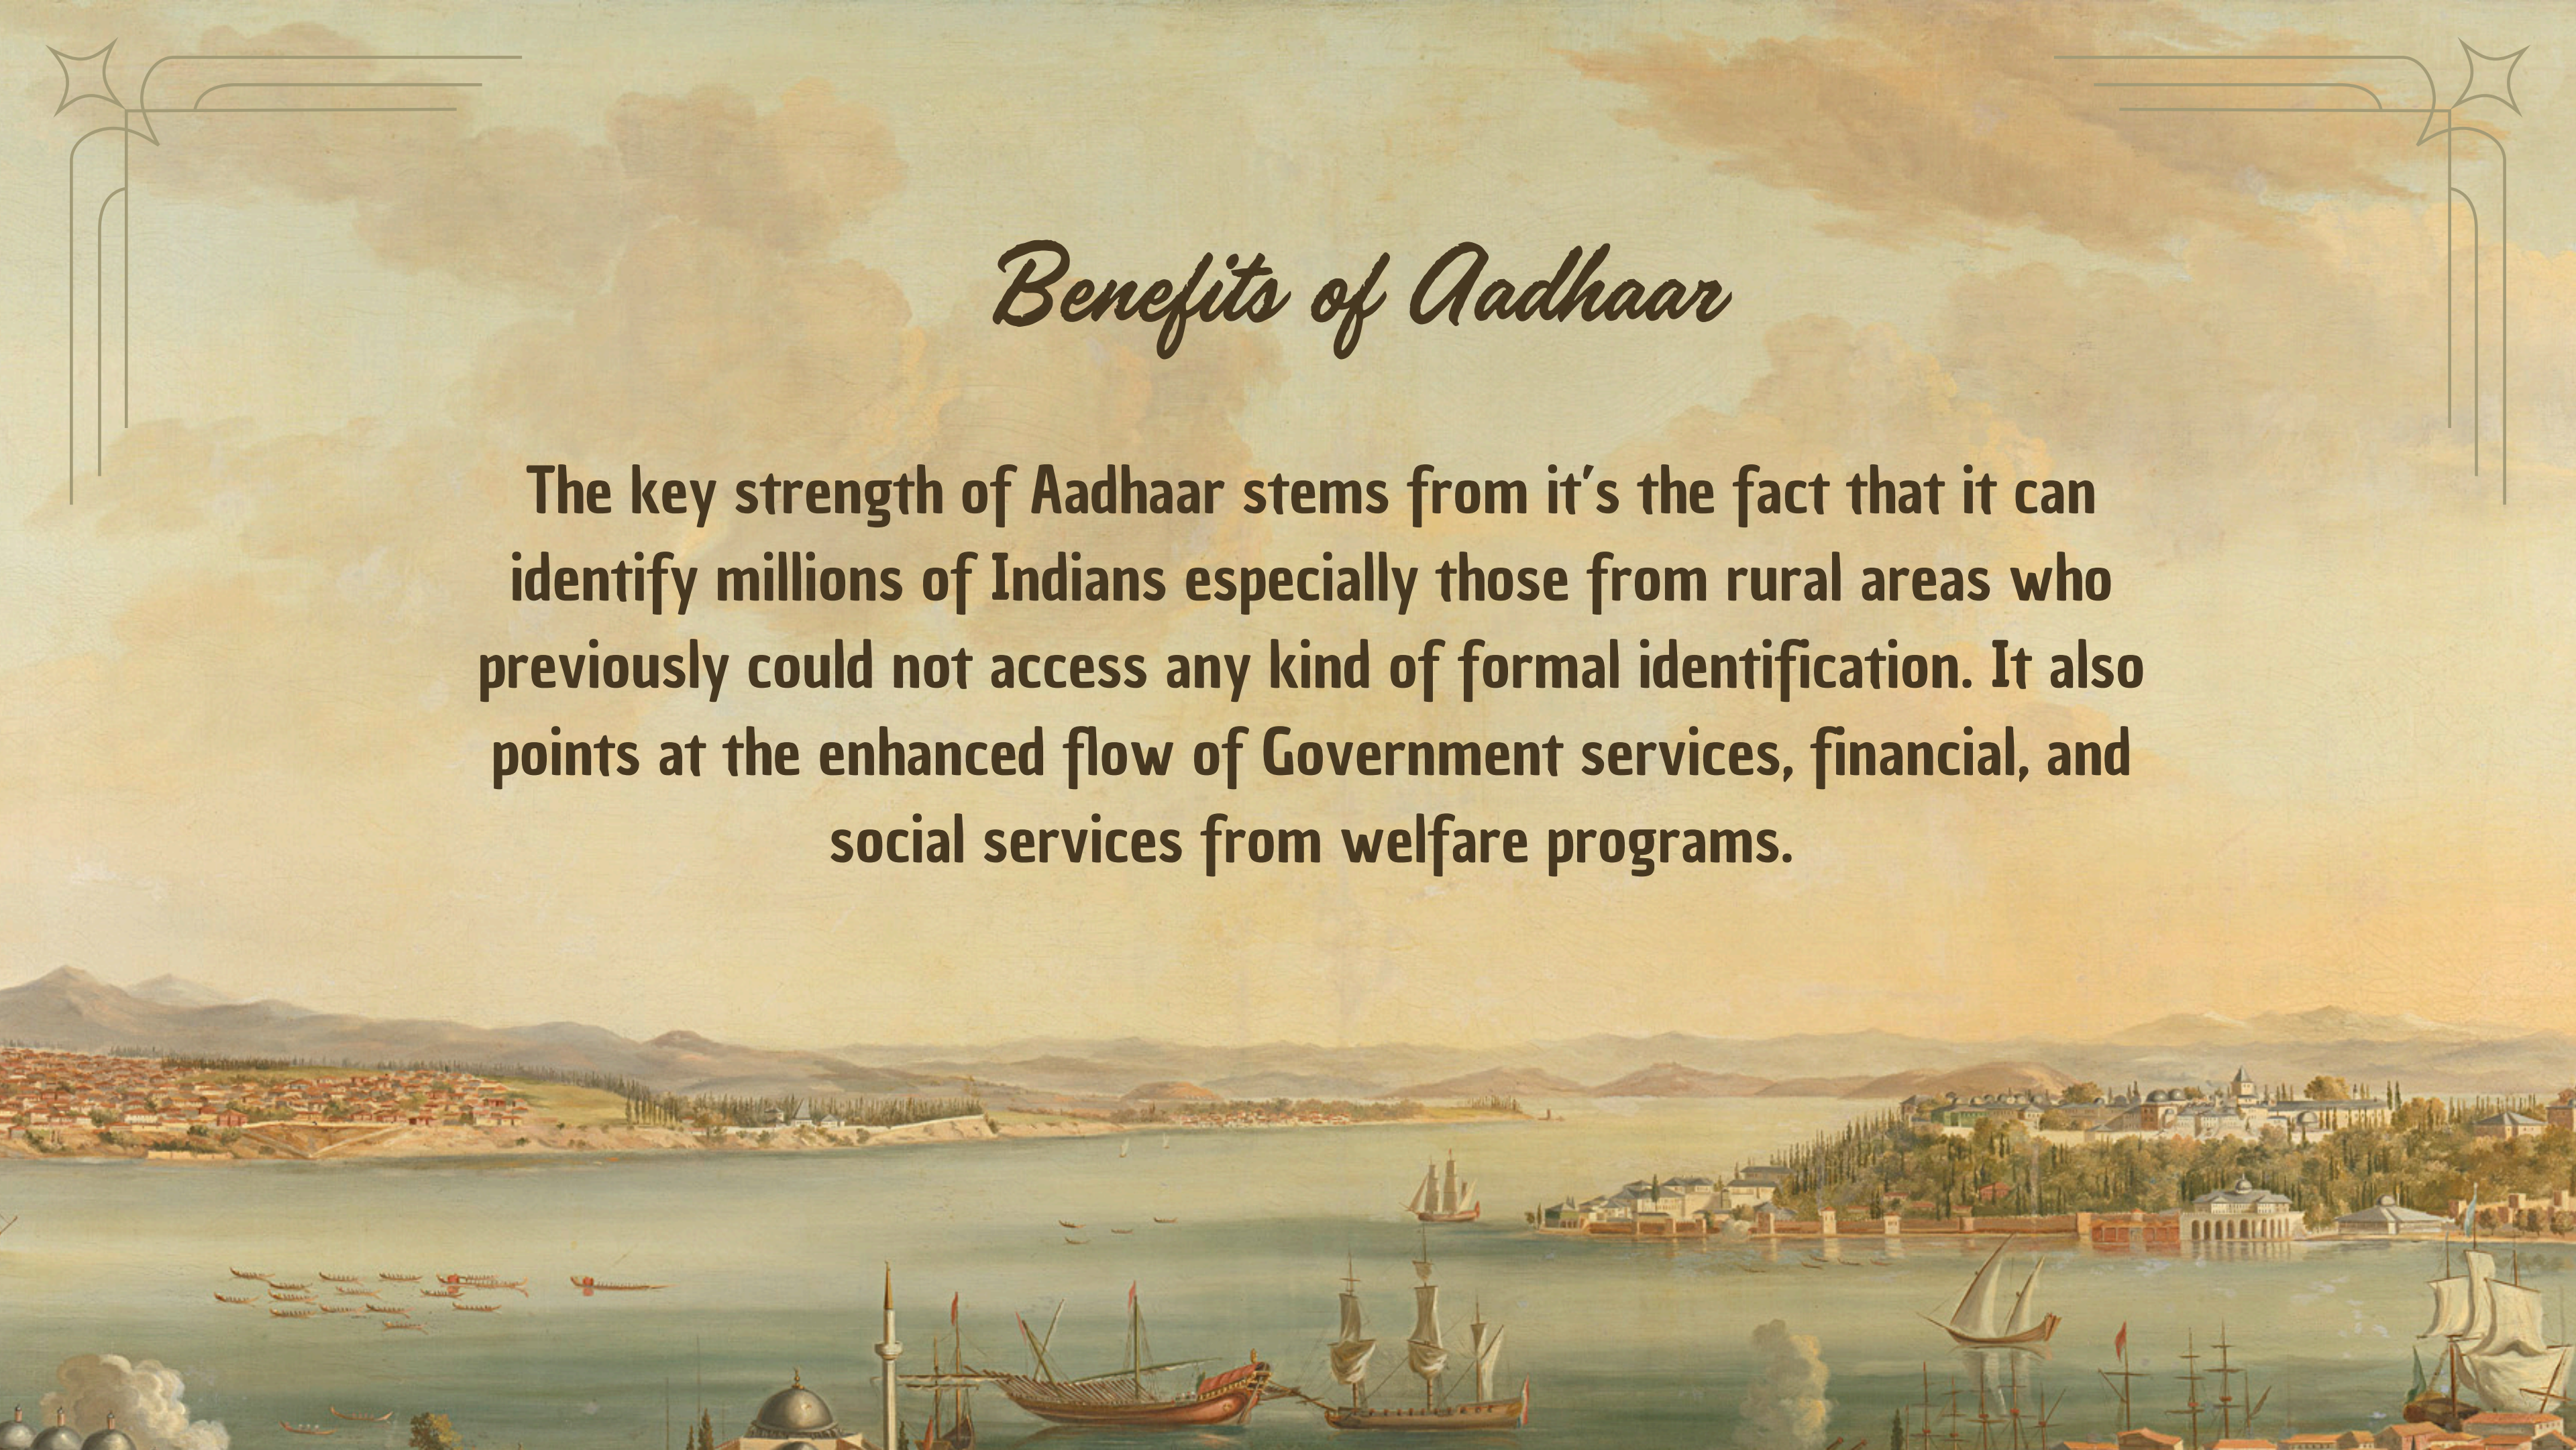

# *Introduction*

**The Aadhaar project which was initiated in the year 2009 by the Government of India is one of the largest biometric identity projects across the world. This is titled “Aadhaar – Giving an Identity to India” which is a case study that can be found on the [casesolutions.com](http://casesolutions.com), examines the issues and prospects in connection with the realization of this large-scale program of provision of discriminating number to the population of India.**

# *Challenges in Implementation*

**Some of the issues that have been underlined in the case include the fact that the Aadhaar scheme is paradigmatically huge. With over 1. Such challenges include enrolling some 1.3 to 1.4 billion adults, and also authenticity checks on each on a scale of 3 billion people in India.**

# *Benefits of Aadhaar*

**The key strength of Aadhaar stems from it's the fact that it can identify millions of Indians especially those from rural areas who previously could not access any kind of formal identification. It also points at the enhanced flow of Government services, financial, and social services from welfare programs.**

# *Conclusion*

**This paper learns a lot about the Aadhaar case solution since it gives a detailed enhanced analysis of one of the most ambitious identification programs in the world. It is expected that the technical, legal and ethical issues have to be tackled to then able to pave way for the long-term sustainability of the solution.
