# **GREENLAND AND THE PARIS AGREEMENT**

# INTRODUCTION

**Therefore, the case of "Greenland and the Paris Agreement" captures the problems and prospects of the country in relation to its economic growth and sustainability. This paper highlights that Greenland is in the middle of the ongoing world's environmental issue as it is wealthy in natural resources and at the same time experiencing the worst impacts of global warming on the ice sheet.**

---

---

# PARIS AGREEMENT

**The Paris accord signed in 2015 is an international treaty that seeks to decrease the emission of the greenhouse gases that cause global warming to less than 2 degrees Celsius above pre-industrial levels. Parties have to form national plans and intentions to reduce emissions also called Nationally Appropriate Mitigation Actions (NAMAs).**

---

---

# KEY CHALLENGES

**The dilemma that complicates the situation in Greenland is that the two agents of this conflict escalate their activity in winter as opposed to summer. On one hand, it needs to industrialize so as to enable its people to have a better standard of living which in turn needs to exploit its resource base including oil & gas as well as minerals.**

---

---

# CONCLUSION

**Overall, it is crucial to consider the case “Greenland and the Paris Agreement” to enhance the understanding with the issues related to decision making on how to further economic development taking into account the environmental effect. The solutions are in applying measures that conform to the goals of combating climate change internationally.**
