

Into Local Streets: The Maryland National Guard and the Baltimore Riots

Introduction

The case study "Into Local Streets: The research paper "The Maryland National Guard and the Baltimore Riots" analyze the events that led to the mobilization of the MDNG during the Baltimore Riots, 2015. These riots occurred after the murder of an African-American man called Freddie Grey when the police severely tortured him causing his death.

Crisis Management

The main focus of this-case solution focuses on how the Maryland National Guard contained the problem. Some of the key role played by this MDNG was to assist the local police in maintaining order and reduce incidences of violence. This case also focuses on the problem of early intervention with children and their parents when the child has not intensified the aggression.

Local Authorities

Military involvement at domestic incidents requires good cooperation between armed forces and police. In the case study, the most highlighted aspect is MDNG's relationship with the Baltimore Police Department as well as other administrators in the city. This was important in ensuring that there was law and order within the protest without disrespecting the rights of the protester.

Conclusion

The case study provides a much insight on how to deal with domestic unrest and military interference in the affairs of civilians. Through this solution, stakeholders can also understand how best to manage crisis, harmony between civil authorities and the military and the right use of force.
