NEGOTIATING TOWARDS THE PARIS ACCORDS – WWF AND THE ROLE OF FORESTS IN THE 2015 PARIS CLIMATE AGREEMENT

INTRODUCTION

The prime treaty that kick started most of the concerted actions towards the mitigation of climate change was the Paris Climate agreement of 2015. Major stakeholders in these negotiations were the WWF which supported the notion of forests in the climate change solution.

CLIMATE CHANGE

Another important factor about forests is that they help in combating effects of climatic change since they work as carbon sequesters removing carbon dioxide from the air. Though, deforestation and forest degradation emit large amounts of CO₂ this added to the greenhouse effect.

CHALLENGES AND NEGOTIATIONS

The third, many problems arose during the negotiations due to raise of antagonistic voices from countries with rather intensive rate of deforestation and rather high economic dependence on various kinds of forest uses. Thus, there was a need to consider the socio-economic development of these countries as WWF

CONCLUSION

Especially noteworthy is the victory of WWF in the negotiation of the Paris Agreement as forests' protector implies the necessity of the effective strategy and cooperation establishment. The case reveals how environmental organizations can elicit change among nations, and infuse sensitivity to sustainability into the foreign policy systems.
