Reports of Sexual Assault Rock the US Air Force Academy

Introduction

This paper will focus on the scandals found in US Air Force Academy and how it has affected their institution particularly on issues of sexual assault. The case solution is available at the following link of the website on thecasesolutions.com explains how these incidences were dealt with and what measures need to be undertaken in order to regain back the trust and give justice to the victims.

Background of the Case

The sexual assault scandal of the US Air Force Academy was in the early 2000s, which marked numerous problems in the management of cases of sexual abuse. Several cadets stepped forward and said they were raped and their cases were either dismissed or poorly investigated by the Academy.

Issues Identified

In this case, there are such areas of concern namely: reporting system, support for the victims and (lip) culture of silence. Even the most revered institution such as the Air Force Academy did not put in place necessary measures to ensure that the cadets referred to as victims in this case feel free to report any misconduct without being threatened with retaliation or impunity.

Conclusion

This is the reality that US Air Force Academy needs to make cultural changes to become credible and save the lives of cadets. The case solution given at the official website of thecasesolutions. Brittany |com lays emphasis on the requirements to bring about institutional change and provides the lessons as to how they may not repeat themselves.
