

*The National
Guard's Response
to the 2010
Pakistan Floods*

Introduction

In 2010, Monsoon rains hit the country and this is one of the severest natural disasters that affected more than 20 million Pakistanis. The National Guard is described in this paper for its response, decision making process and the problems during the involvement in this humanitarian crisis.

relief efforts.

Response to the floods that hit Pakistan in 2010 was an effort by the National Guard among many and other countries. A chunk of its structures and millions of its population displaced the National Guard was an asset in the immediate rescue. Some of the actions they took was sending people, providing both medical support, drinking water, food and dishes and engaging in search and rescue in the affected regions.

Strategic Decision

It was the strategy that the National Guard used which meant that it enjoyed much success in helping Pakistan. From the point of view of the suffering it saved and the resources it devoted to it, the Guard was very effective and useful in using its resources to target the areas most in need to quickly solve acute problems and participate in the gradual recovery work.

Conclusion

The Pakistan floods of 2010 are also a fine example of the National Guard's practicality in the disaster management process. Through their quick and synergistic responses, millions were saved and it will serve as a good example of how the rest of the world could combine their resources to help out during calamities.
