# **The Concept of Institutional Entrepreneurship and Transformational Leadership in Project Success**

# Introduction

When it comes to project success, the institutional entrepreneurship and transformational leadership are two crucial concepts. Proactivity, innovation and a visionary approach characterise them because modern environments can hardly be managed without proper strategies and useful visions. In this article, the concepts discussed above are analyzed related to the field of project management and key insights derived from any of the cases attached to the [casesolutions.com](https://casesolutions.com).

# Institutional Entrepreneurship

Institutional entrepreneurship can be defined as anything that involves the work of individuals and collections of people in the formal production of new or radically altered institutions and/or in the preservation of existing institutions. The definition of institutional entrepreneurs in the field of project management refers to persons who disrupt the traditional ways of doing things and look for opportunities to foster change to enhance the delivery system. They are very useful in detecting institutional voids, cultivating culture of improvement, as well as in synchronizing projects' aim with the general organizational goal.
